### Carbon, Chemical Element

Test, observation and inference should be given. If its the salt of an aromatic carboxylic acid, you get little odour and maybe a white crystalline precipitate.

### Lassaigne's test to detect foreign elements present in organic compounds

This means that all organic compounds have in common the presence of carbon atoms and hydrogen atoms.

### Detection of Elements: Lassaigne's Test (Theory) : Organic Chemistry Virtual Lab : Chemical Sciences : Amrita Vishwa Vidyapeetham Virtual Lab

So, a greenish solid may result. Industrial diamonds do not have to be free of flaws, as do jewelry diamonds.

### LASSAIGNE'S TEST

Isotopes are two or more forms of an element. More on that next time. The smoke may have collected on the ceiling of their caves as soot.
