NachNaff and AO scales discriminated as hypothesized between students' choices of academic majors, but the TAT ratings did not.

Han'guk ŭi kyoyuk kwa kukka palchŏn (1945)

Achievement motivation is one factor to hold academic achievement that can be influenced by student self concept. Also included are recommendations, based on empirical evidence, for enhancing academic intrinsic motivation in learners of varying abilities at all grade levels.

Kim, Mi

The analyses compared the top 10 percent of students with the 10 percent of the students whose scores clustered most closely to the average on a tests of cognitive ability and then on b tests of mathematics achievement.

Han'guk kyoyuk chaejǒng kujo kaep'yǒn panghyang solchǒng yǒn'gu (2007 edition)

Abstract sommario : Three studies of samples of university women Ns between 50 and 79 and men Ns between 28 and 47 were undertaken to determine the concurrent validity of two questionnaires and a TAT test, each purporting to measure achievement motivation. Other Titles
Development of television programmes for the improvement of enrivonmental education in elementary and lower secondary schools. Preliminary data are presented on a modified pictorial scale of perceived physical competence for use with 7- to 12-year-old students with mild mental retardation.
