inventions of John Napier, of Merchiston; : Buchan, David Stewart Erskine, Earl of, 1742
An account of the life, writings, and

It involves the Napiers, the Haldanes of Gleneagles, and the Stewarts of Darnley.

John Napier of Merchiston

Thorough history of the life of John Graham of Claverhouse, who was related to the first Marquis of Montrose.

Napier, Lord John

As a child, John Uppike dreamed of being a cartoonist for Walt Disney or even the New Yorker.

Napier, Lord John

Although probably only of interest to mathematicians, the book is worth reading for the Introduction 94 pages. At the age of 13, he entered the University of St.

John Napier

Nunc autem ipso ex hac vita evocato, totius negotii onus doctissimi Briggii humeris incumbere, et Sparta baec ormanda illi sorte quadam obtigisse videtur. . He was appointed Treasurer Depute of Scotland by King James and continued in that position under King Charles.

Biography of John Napier, Scottish Mathematician

Princeton: Princeton University Press, 2010, pp. In the beginning of the 17th century the turret lathes had not been invented yet, so the pinion-wheels have to be produced manually and with great precision, otherwise the friction in case of full carrying for example when to 999999 must be added 1 will be enormous and the machine will be hard for operating and easy to broken.

Wilhelm Schickard and the Rotating Clock (Complete History)

Scotland had produced nothing, and was perhaps the last country in Europe from which a great mathematical discovery would have been expected. When the castle was completed in 1574, Napier and his wife took up residence there. .
