Many buyers purchase a number of lots. This aspect of masculinity studies increases the tendency for scholars to point to a sea change in identities somewhere between the seventeenth, eighteenth, and even nineteenth centuries, where there may not be any, or where such change has been overstated. In this the principle of the Movement of threes is introduced, and chiefly compiled by ourselves, as the printed books are not sufficiently full on this subject.

Through horses, men came to know a multispecies identity complete with its own communication systems, modes of sociality, performances, and epistemologies. In general, however, a horseman was a man who practiced the manège, to some extent, and someone who possessed skill, again to various degrees, in unmounted horsemanship.
