Such societies even if they were to become more affluent may continue to find happiness elusive even for retirees. The Almost Nearly Perfect People: Behind the Myth of Scandinavian Utopia. Freud believed that our behavior is guided by unconscious forces and by examining our thoughts and behavior we can discover our true selves.

Robert Bruce Raup

When complacent, the valued things that had captivated our thoughts, hearts, and energies tend to fade from priority and can even become mundane or the boring routine of everyday life.

The Curse of Complacency

Has his thirst for knowledge dried up? As such, it is a potentially useful method of analysis. Automation may result in the narrowing of focus and the loss of situational awareness. Seen in this light, contentment is not an achievement but an attitude that one can adopt at any time.
