How to Punctuate Character Thoughts

So what can you do? The distinction between, and independence of, each of these processes is blurry. Rather we will cheerfully repose ourselves on that heavenly Father, who knows we have need of these things; who has given us the life, which is more than meat, and the body, which is more than raiment.

Don't brainstorm, take a 'thought shower'

These pathogens flourish when they are ignored, tolerated, or encouraged.

Taking thought

The reason you have them more often is because your anxiety brings them back. Although characters can wonder questions, wondering in itself is not a question. During this time focus only on the air going in and out and nothing else.

Taking Thoughts Captive

The distinction between, and independence of, each of these processes is blurry. My main character is going back in her thoughts to a scene that happened hours ago.

NAIS

But—I kept hearing her plaintive question—How would you define love? But I only get five seconds? All of the above combinations and variations are common. What you want to do is identify that the dream section is something other, something different from the surrounding text. These startle-elicited responses may be quicker because they involve a relatively shorter and less complex neural system—one that does not necessarily require the signal to travel all the way up to the more complex structures of the cerebral cortex.

It feels instantaneous, but how long does it really take to think a thought?

Exactly how long does it take to think a thought?

I do have a couple of articles on setting. For example: Stress changes how the brain functions. The Internet Encyclopedia of Philosophy.
