Critical raw materials

Start Further Info FOR FURTHER INFORMATION CONTACT: Ryan Nichols, 202 208-7250,. While these minerals do not currently meet the definition of critical, they are similar to critical minerals in that they are indispensable to a modern society for the purposes of national security, technology, infrastructure, and energy production both fossil fuels and renewables. Because the critical minerals on the final list are administered under existing mineral disposal laws and regulations, any recommendations to improve permitting processes for those critical minerals will improve permitting processes for all minerals administered under the same laws and regulations by the Bureau of Land Management and other Federal land management agencies.

Critical raw materials

SUMMARY: The United States is heavily reliant on imports of certain mineral commodities that are vital to the Nation's security and economic prosperity. EIT RawMaterials will publish details of how to join the alliance.

Critical raw materials

On January 13, 2014, the Office of Administrative Law approved CalRecycle's.

EURACTIV special report on critical raw materials in Europe

EURACTIV is running a special report on Europe's renewed drive for strategic autonomy in relation to critical raw materials. Recycling is but one solution to the supply chain challenge. Normal business hours are 9:00 a.

Critical Minerals Report: A Path Forward

Reviewing important sectors for CRMs, it describes relevant EU policies, refers to key initiatives, presents and gives sources of data, identifies good practices and indicates possible further actions.

Critical Minerals Report: A Path Forward

By bringing together all relevant stakeholders along strategic value chains and industrial ecosystems, the alliance will initially focus on the most pressing needs, namely to increase EU resilience in the rare earth elements and permanent magnet value chains. To this end, we intend to work with a diverse group of partners to translate these tenets into specific state and federal policy recommendations.

Critical raw materials

Imported Material Report IMR The emergency regulations require any person importing empty beverage container materials greater than 25 pounds of aluminum, bimetal or plastic, or more than 250 pounds of glass to provide a fully completed and signed IMR, and all applicable required supporting documentation, to CDFA personnel upon seeking entry into California. Although the domestic production of certain critical raw materials exists in the EU, notably hafnium, in most cases the EU is dependent on imports from non-EU countries. Be advised that this reference only version of the IMR cannot be completed and submitted to, and will not be accepted at, a CDFA border station to meet the regulatory reporting requirements.
