The Impact of Airport Development on Economic Development

Prepared for the Defense Advanced Research Projects Agency by Rand WN-8718-ARPA. With the shift in priority for strategic attacks -- first to marshalling yards and bridges in France in preparation for invasion, immediately followed by the air campaign against oil -- the continued attacks on the aircraft industry were suspended. Examination of the steel plants showed that, although the attack damaged some blast furnaces, open hearths and rolling mills, it was primarily effective through damage to utilities electricity, gas and water and communications within the plants and to utilities and transport supplying the plants.

Electronic Records Relating to the Vietnam War

In some 50 cities that were primary targets of the air attack, the proportion of destroyed or heavily damaged dwelling units is about 40 percent.

Records of the Federal Aviation Administration [FAA]

Three additional agreements are signed with different unions representing land-based personnel.

Electronic Records Relating to the Vietnam War

Therefore, more educated male workers have a higher probability of choosing to work in these firms.

Air cargo operations: Literature review and comparison with practices

Records of the Management Analysis Division, consisting of records of the division director, 1956-77; and case files on canceled issuances, 1964-81. According to regulations adopted in 1942, the ASF had responsibility for a number of air base functions ranging from general courts-martial to operation of laundries. The authors compared the process with equivalent processes in other services, local government, and industry, examining

the literature and conducting interviews with practitioners.

U.S. International Air Passenger and Freight Statistics Report

Also, the two sub-sectors differ in some characteristics of workers and jobs that should be mentioned. Germany's armament minister Albert Speer, who assumed office in early 1942, rationalized German war production and eliminated the worst inefficiencies in the previous controls. Charts 12 items, in Kansas City : Graphs, charts, and tables removed from the historical reference file, 1953-56.

United States Strategic Bombing Survey Reports

The basic difficulty stemmed simply from the fact that there were not enough skilled technicians to meet other demands for their services and still leave enough to man the air service and air depot groups, nor was there time to train the unskilled hands available to the all-round competence that traditionally had characterized the Air Corps' mechanics. Before the war, the U. On the Transportation Corps, see Wardlow's volume cited in n.
