### Overview of Strategies for Making Connections Between Transportation, Land Use and Air Quality

Secondly, we hope to encourage senior citizens, recent retirees, and Baby Boomers to be proactive in planning for their future housing and care needs, and provide ideas and information to help them do so. It is either used at the trip generation stage by stratifying the total trips or at the assignment stage of the model. It provides tools and recommended best practices that can be implemented to reduce exposure and emissions from local sources of air pollutants.

### Air Pollution Control District

Changes in legislation that permit the use of larger electric-assist cargo bikes have helped. Although this guide is written from the perspective of older persons, the features and services discussed promote livability for persons of all ages and abilities.

### Transportation, Land Use, and Air Quality: Making the Connection

Modern systems can even see whether a bus is running on or behind schedule, and vary the amount of priority it gives accordingly. The following guiding principles have been listed by Wittelegg 1993 for sustainable transport development: 1 Transport is a vital element in economic and social activities but must serve those activities rather than be an end in itself.

### CDC

Which will allow to effectively reduce the urban and suburban traffic. Specifically, the models suggest that a 10% reduction in VMT can be achieved with a region wide increase in the quality of the pedestrian environment to a level comparable to that currently available on Portland's most pedestrian-oriented zones today. Autonomous and Connected Vehicles Perhaps the most anticipated element of ITS is the connected vehicle.

### Listening to the algorithm of the rainforest

Smart growth land use strategies can reduce our dependence on cars, minimize energy consumption, and improve community air quality.

### **Equity**

In addition, the dataset may not fully represent a typical cross section of Portland households.
