

Reflections on the 15 foot bubble chamber at Fermilab

Fermi National Accelerator Laboratory - Quantum Diaries

Description: -

-
Municipal water supply -- Iowa -- Muscatine Region
Groundwater flow -- Iowa -- Muscatine Region
Bubble chambers -- Illinois -- Batavia -- History.
Fermi National Accelerator Laboratory -- History.
Reflections on the
15 foot bubble chamber at Fermilab
-Reflections on the 15 foot bubble chamber at Fermilab

A high resolution holographic freon bubble chamber for the Fermilab high energy neutrino experiment

Furthermore, the bubble tracks are formed within the three dimensional volume of the 15 ft spherical shape bubble chamber which would result in some of the the spiral bubble tracks formed within a three dimensional volume of the bubble chamber to overlap and be tilted but all of the bubble tracks appear in a single two dimensional plane which proves the Fermilab photographs are fabrications. Today I don't think there are any bubble chambers still in operation with particle beams, because there are much better detectors available.

Phys. Rev. D 14, 5 (1976)

Recycler Ring Gerry Jackson Sept.

One minute with Ron Davis, neutrino operations supervisor

Present address: National Laboratory for High Energy Physics, Tsukuba 305, Japan. No, I was studying to be an auto mechanic in Chicago when I applied here.

Fermilab Today

THAT is why the arc welder leaves holes, and not a proton therapy beam or a Fermilab proton beam or a cosmic ray flux. This experiment used a kaon beam.
