### **Stigma and Ebola survivorship in Liberia: Results from a longitudinal cohort study**

The mean baseline stigma score was 5.

### **Education**

Commercial gold exports, commercial palm oil production, and cocoa and fisheries investment have expanded.

### **The situation for children in Liberia**

Psychosocial effects of an Ebola outbreak at individual, community and international levels.

### **Basic education**

Those entering the cohort study later could also have been more stigmatized survivors who were initially reluctant to join the study, and did so only after more time lapsed.

### **Liberia Economic Outlook**

A total stigma score was derived for each participant at each visit and was calculated as the proportion of all answered questions that indicated stigmatization multiplied by ten. Each bill introduced in the House and Senate is recorded in the set.

### **Years of Civil Conflict in Liberia Create Waste Mismanagement and Health and Environmental Degradation**

This Peace Brief, based on USIP research, assesses the risk of election violence and the scope of violence prevention efforts, and provides recommendations for ongoing prevention. The contribution may include labor, local materials sand, wood, rocks and bricks land, cash, etc.

Drawing on the lessons from the stigmatization of those with HIV infection, Davtyan and colleagues recommend several approaches to addressing similar attitudes toward survivors of EVD.
