From the Closed World to the Infinite Universe: Notes

There is no doubt that to maintain the optimum placement and perfect order of the parts of the universe as to local situation, nothing will do but circular motion or rest. But I wonder if we may not proceed to the matters on which we intended to converse; for we have now spent many minutes on these polite exchanges, pleasant as they may be, and I cannot but help that I fear we may be in danger of losing our audience. Brotherton MS, Item, fols 75r-v.

Dialogue Concerning the Two Chief World Systems by Galileo Galilei

This is not changed if the earth rotates every day, but if the earth is stationary then we suddenly find that the sphere of the fixed stars rotates in 24 hours. It is important as a historical document, culturally as well as scientifically.

A Dialogue on Adaptation Literature/Film Quarterly

After his rebuff in Rome, Galileo returned to Florence, where he settled in the well-appointed villa of Bellosguardo, on a hill west of the city.

Dialogue Concerning the Two Chief World Systems
