Economics

Policies for resource efficiency, incorporating elements of Circular Economy, can be traced back to the 1980s and 1990s in German and Japanese strategic decision-making, largely influenced by the intriguing and then new concept of the closed-loop economy, as presented in the Spaceship Earth analogy of Boulding, and later developed by Stahel and Reday-Mulvey. Furthermore, the macroeconomic factors of the developed countries moved almost in parallel with each other in the 1970s and 1980s.

Advancing to a Circular Economy: three essential ingredients for a comprehensive policy mix

The number and complexity of interactions among actors in a Circular Economy create a complicated policy landscape, which inevitably extent across the different parts of production and consumption systems and affect directly or indirectly several other parts in the value chain. In this period, Turkey did not have institutionalized trade unions.

The 6 Elements of Truly Transformative Business Models

This does not mean that anything goes. The domestic consumption growth was supported through forcible regulations in Turkey.

Economics

What does achieve such a transformation is a business model that can link a new technology to an emerging market need. To maintain order and resolve conflicts, collective action creates a system of government that lays down the working rules guiding individual action. This could suggest that grandfathering should be regarded as state aid, since grandfathered permits are a capital gift which implies a financial advantage for firms.

Strategic Thrusts

As seen, there is a parallel movement of workers in the manufacturing sector and service sectors over these years, which shows a transformation away from the agricultural sector. At the center stands pricing power of the firms. How Economics Forgot History: The Problem of Historical

Specificity in Social Science.
