## Land Use and Land Cover Change in Sagarmatha National Park, a World Heritage Site in the Himalayas of Eastern Nepal

Air quality, including particulate matter and ground-level ozone, is positively associated with increased temperatures and has been well-documented to show deleterious impacts on morbidity and mortality. Department of Agriculture, Forest Service, Northern Research Station: 60-66. Ecology and Society 18 1 : 32.

## What is landscape? What is landscape architecture? What is landscape ...

Additionally, in-depth interviews with local decision-makers on water management across scales have suggested that a lack of political and financial support at the state and federal levels is a barrier to adaptation action in cities and counties. An important seasonal event for biological activity in the Great Lakes is the turnover of water, or destratification, which historically has occurred twice per year. Forest management on tribal lands and ceded territory within the region increasingly integrates Scientific Ecological Knowledge of natural resource management with Traditional Ecological Knowledge, a highly localized, place-based system of knowledge learned and observed over many generations.

## The growing importance of Land Use, Land Cover (LULC) studies in environmental planning and policy

Winfree, 2013: Historical changes in northeastern US bee pollinators related to shared ecological traits. There is consistent evidence from behavioral and public health research showing that responses to extreme heat serve as examples of climate change adaptation.

## What is landscape? What is landscape architecture? What is landscape ...

Remote Sensing of Environment, 97 4 : 434-446. Environmental Health, 16 1 , 38.
