Once this has been done, it would undoubtedly be impractical for those provinces to extricate themselves from the Cooperative System at a later date.

**Renewable fuels regulations**

It must be coupled with other policies, including efficiency and GHG gas emission standards for new cars, infrastructure to support alternative fuel penetration, and incentives to reduce driving and promote transportation alternatives. First, it held that the involvement of the Council of Ministers

in the proposal of amendments to the Model Provincial Act as set out in ss. Third, the broader the pool, the greater the options available to regulated entities, and more choice means lower overall cost, because there will be a greater chance of finding low-cost options to meet the targets.

### **Renewable & Low Carbon Fuel Requirements Regulation**

Former Federal Reserve chairman Alan Greenspan, car companies, and economists on the left and the right all have supported carbon and fuel taxes as the principal cure for both oil insecurity and climate change.
