On examining the contents of the crucible after cooling, it was found that the edges of the bricks remained perfectly in tact, showing 8 H  
GEOLOAI CAL SURVEY OF CANADA.

**Temporal variability of dissolved methane and inorganic water chemistry in private well water in New Brunswick, Canada**

A first principles approach to thermal conductivity measurements of solids. A History of Long-Term Human—Environment Interactions in the French Pyrenees Inferred from the Pollen Data.

**Atlantic Geoscience Society.**

The delivery of occasional lectures to popular audiences on this and kindred subjects, has convinced me that the beginning of life in the earth is a theme having attractions for all intelligent persons; while the numerous inquiries on the part of scientific students with reference to the fossils of the Eozoic age, show that the subject is yet far from being familiar to their minds. In the case of Eozoon we must imagine an ocean floor more uniform and level than that now existing.

**Life's Dawn on Earth, by J. W. Dawson, a Project Gutenberg eBook.**

The NBCC historical resources have a nice section on and also one on. Historical and contemporary metal budgets for a boreal shield lake.

**Bay of Fundy: Albert County's Mining Past**

Marine Pollution Bulletin 2014, 85 1 , 99-113.

**North American Carbon Program**

The Blairmore-Frank field is situated in the southern part of the province and is served by the Crows Nest branch of the Canadian Pacific railway.
