The Schwinger Effect: non

AB - When some people leave us, the world becomes emptier and colder... Ian Kogan was born into a Jewish family on September 14, 1958 in Glazov, a small town in the Northern Urals, far away from all the cultural centers of what was then the Soviet Union.

Effective Actions in quantum field theory and string theory

Braneworld theories are often described as low-energy effective field theories EFTs featuring an infinitely thin 3-brane and 4D fields exactly localized on it. FROM FIELDS TO STRINGS: CIRCUMNAVIGATING THEORETICAL. .

From fields to strings: Circumnavigating theoretical physics: Ian Kogan memorial collection — Experts@Minnesota

This system can also be interpreted as noncritical type 0 string theory in a two-dimensional target space. .

Effective Actions in quantum field theory and string theory

Rothstein, High-energy field theory in truncated AdS backgrounds, Phys. .

CiteSeerX — Through the Looking

The OB theory is similar to the realization of two-dimensional bosonic string theory via matrix quantum mechanics in an inverted harmonic oscillator potential; the difference is that we expand around a non-perturbatively stable vacuum, where the matrix eigenvalues are equally distributed on both

sides of the potential. Synopsis : From Fields To Strings Circumnavigating Theoretical Physics Ian Kogan Memorial Collection In 3 Vols written by Shifman Misha, published by World Scientific which was released on 03 February 2005. This is the most comprehensive review collection reflecting state of the art at the end of 2004.

Download From Fields To Strings Circumnavigating Theoretical Physics I

After reviewing and extending the traditional descriptions of this class of theories, we provide a matrix model description.

CiteSeerX — Through the Looking

Focusing on the gauge-gravity sector we show that manifestations of the quasilocalized warped braneworld include i an anomalous running of SM gauge couplings ii a conformal contribution to SM gauge boson scattering induced by 5D gravity.
