### Congressman Cohen Questions Experts on Improving School Bus Safety

For school buses with GVWRs less than or equal to 10,000 lb, seat belts lap belts became required equipment. Fatal Accidents Involving School Bus Passengers Between 1982 and 1986, 60 school bus passengers were killed in 26 separate accidents.

### Report Contents

Five developmental seat and restraint combinations were tested, along with a standard seat and lap belt combination that served as a baseline for comparisons Table 4-7. This Special Report presents the results of that study. Central School District, attributes bus drivers rushing through their runs as a major cause of by-own-bus fatalities in the danger zone.

### Improving School Bus Safety

Furthermore, if the height of school bus seat backs is raised to a point above the lower edge of side windows, the seat backs may be an obstacle to emergency window exitsâan obstacle that may be prohibited under certain provisions of FMVSS 217, the standard that governs emergency exits on school buses.

### Congressman Cohen Questions Experts on Improving School Bus Safety

The results of the comparative analyses conducted in this study are discussed in Chapter 6. In addition, about 480 children are seriously injured while riding in school buses, and 160 are seriously injured while boarding or leaving school buses.

### NJ school bus safety: Here are some ways to improve the system

These programs should stress safe and appropriate behavior in school bus loading zones. It includes the following chapters: 1 Introduction; 2 School Bus Transportation in the United States; 3 Frequency and Characteristics of School Bus Accidents; 4 Measures To Enhance the Safety of

School Bus Passengers; 5 Measures To Prevent School Bus and Pedestrian Accidents; 6 Cost-Effectiveness of School Bus Safety Measures; and 7 Conclusions and Recommendations. NHTSA should monitor this research to determine if and when these new materials should be required in school bus construction by federal standards for school bus construction.

## **20 Ways To Increase School Bus Safety**

The scope of school bus operations in the United States, and the fatalities and injuries that result from those operations, is discussed in Chapters 2 and 3. For Type I school buses buses with GVWRs greater than 10,000 lb , the compartmentalization requirements of the standard apply.
