It looks back at the lessons of the last half century while looking forward to population policies that are sustainable and just.

**A Pivotal Moment**

If only because, first, we want to preserve reasonable, limited rights to consume and procreate for future generations; and second, because we want to preserve the very existence of the ten million or so other species with whom we more and more grudgingly, it seems share our planet. It surveys the new demographic landscape in which population growth rates have fallen. It provides a compelling, evidence-based case to support renewed attention to reproductive health and rights as a critical part of the solution to build a better and more sustainable future for all.

This should not surprise us — they were not designed to do so. These include investments in education, health, and technology; better access to reproductive health care and contraception to slow population growth voluntarily; and reforms that promote greater social and legal equity. Bongaarts is a member of the U.
