## Nuclear Programme of Pakistan

The CTBT's entry into force requires the adherence of all the 44 designated states, including all nuclear weapons states, whether or not they are recognized as such. Indian Navy IN vanguard elements operating out of the Andaman Sea and the Andaman Nicobar Command will be supported by elements from the Western Naval Command and flanking elements operating from the Malacca strait in the west to the Ombai and Wetar straits in the east. These configurations relating to US-China and China-Pakistan relations do pose serious security challenges to India especially, pertaining to Indian missile and nuclear programmes.

## The Nuclear Subcontinent: Bringing Stability to South Asia

KANUPP started working in 1971. The paradox here is that China has very good relation with one of the nuclear power of the region; Pakistan where as equally have aggressive relations with another nuclear power; India, although the existing relation is indicating harmony through economy and trade. At contemporary South Asian politics the level of mistrust for these two nations is not just limited between them but also expanded to other non nuclear members.

## Nuclearization of South Asia

However, observers have long questioned the viability of these policies in a state whose ethnically and religiously disparate population and has demonstrated to extremism.

## Nuclear Pakistan: Atomic threat to South Asia by Sinha, Prem Bahadur

The region is home to some 2. Foremost reason behind the detonation of nuclear weapons by Pakistan was continuous threats of security by his neighborhood.

## What About Pakistan? The Threat of Nuclear Terrorism in South Asia

Canadians also stopped supplying fuel to Pakistan for KANUPP. Atomic Energy Commission Chairman Glenn Seaborg suggests that the Embassy in New Delhi coordinate exchanges of information between India and the U. And have made the situation even more dangerous.
