Kitāb Tahdhīb al

Given the significant presence of polemical debates in many of the longer surahs, it is fitting that Qur’ānic Arabic should have a designated word for the activity of religious disputation: the text contains more than two dozen occurrences of the verb jādala and the corresponding nouns jadal and jādāl. Admittedly, these accounts contain some details which seem to be implausible or, to put it more cautiously, await explanation, but the Western views which claim to replace them by more plausible and historically more reliable accounts are obviously far from what they make themselves out to be. In the latter cases it is not clear whether sunna refers to the habitual practice of a person, the Islamic community, or the older Arabian tribal society. The opposition between these two approaches, i. Surely this is an amazing thing indeed! His forthcoming monograph examines the conflict between ḥadīth and science.
