### Freud and the Psychodynamic Perspective

In 1885-86, Freud spent the greater part of a year in Paris, where he was deeply impressed by the work of the French neurologist Jean Charcot who was at that time using hypnotism to treat hysteria and other abnormal mental conditions. But in all cases the cure is created essentially by a kind of catharsis or purgation—a release of the pent-up psychic energy, the constriction of which was the basic cause of the neurotic illness.

### Freud, Sigmund

In projection, a person refuses to acknowledge her own unconscious feelings and instead sees those feelings in someone else.

### Freud's Followers

According to Freud, certain ideas, thoughts, and memories are repressed and made unavailable to the conscious mind.

### Freud and the Psychodynamic Perspective

The task of the psychoanalyst is often to uncover these buried experiences and feelings, to reduce the tension between the conscious and unconscious minds.
