Choice of Financing and Governance Structures in Transport Industry: Theory and Practice

This expansion has been fueled by the growth of developing markets, the drive to privatize, the emergence of global financial powerhouses including investment banks, and technology advancements. In the United Kingdom, these foreign bonds are called bulldog bonds. The next two chapters focus on specialized intermediaries offering urban infrastructure finance in cities.

Infrastructure Development and Economic Growth: An Explanation for Regional Disparities in China?

This formula yields the most workable results. At the same time, more countries that have not yet received substantial

How IFC does Mobilization

*B Loans

- Open local markets to foreign banks and introduce them to clients
- Help to demonstrate mis-perceptions of risk in these markets

*Local Currency

- Help to increase the depth and liquidity of cross-border ring markets
- Strong market development is an important factor for overall capital market development

*Securitization and Guarantees

- Help to deepen and broaden domestic financial markets
- Help to improve risk appetite of domestic financial institutions

 World Bank discussion paper, Mobilizing domestic capital markets for
 infrastructure financing - international experience and lessons for
 China
 Notes: Report summarizes key elements of the papers presented at a
 conference held in Beijing on Nov. 12, 1996.
 This edition was published in 1997

private capital flows are starting to build up
 the financial infrastructure to begin
 receiving them and need help in structuring
 it in ways that allow them to benefit from
 globalization. The most common example
 of a debt instrument is the A debt
 instrument.

Financing for Development

The final two chapters examine
 experiences with two other mechanisms for
 mobilizing funding for infrastructure
 investments from the private sector, land
 leasing and sales Chapter 10 and private
 participation in infrastructure operations
 Chapter 11. This created what is known as
 the US dollars deposited in any bank
 outside the United States. Money flows to
 markets with the best regulatory
 environments or to markets that are seen to
 have exceptional return potential.

Infrastructure Finance—Colombia and FDN : Lessons on Infrastructure Lending from Colombia

Alison: No, but financing is clearly needed
 to create the elements needed to help
 reduce poverty—e. The participants in the
 Eurocurrency markets are very large global
 firms, banks, governments, and extremely
 wealthy individuals.
