

History of modern philosophy in France

The Open court publishing company; [etc., etc.] - Modern & Contemporary

In his work, entitled 'Principles', we see him present his general understanding of philosophy:

"Thus the whole of philosophy is like a tree. The roots are metaphysics, the trunk is physics, and the branches emerging from the trunk are all the other sciences, which may be reduced to three principal ones, namely medicine, mechanics and morals. By 'morals' I understand the highest and most perfect moral system, which presupposes a complete knowledge of the other sciences and is the ultimate level of wisdom"

In its development it is solidary with the simultaneous development of the other series of social and intellectual phenomena, of positive science, of art, of religion, of literature, of political and economic life; in a word, the philosophy of a people is a function of its history.

History of Modern Philosophy in France by Lucien Lévy

Descartes and Modernity Descartes is often regarded as the first philosopher of modernity. Now, philosophers without marked originality—those, for instance, who were simply disciples of the masters—have indeed their value in the eyes of that erudition which wishes to know all there is to be known of a certain epoch.
