Study Rewrites History of Ancient Land Bridge Between Britain and Europe

People from continental Europe began to settle in different parts of Britain after the last Ice Age, around 12,000 years ago.

Settlers: Genetics, geography, and the peopling of Britain

Despite this, Britain retained its primeval forests longer than most of Europe due to a small population and later development of trade and industry, and wood shortages were not a problem until the 17th century. We should start with what I have called the Atlantic archipelago — since the term 'British Isles' is one which Irishmen reject and Englishmen decline to take quite seriously.
