maintain high routine RCV coverage are needed.

## Public Health in South Asia

This enables local residents to overcome many of the traditional barriers to healthcare access, all while relying on support from a local peer to navigate the system.

## Progress Toward Rubella and Congenital Rubella Syndrome Control — South

Most hospitals are still using internal based information systems HIS , and there are no major digital providers. Regional environment and health The environment continues to be an important contributing factor to disease and mortality in the developing world, including countries in Southeast Asia, accounting for up to a quarter of all deaths.

## Budget 2021: PM Atmanirbhar Swasth Bharat Yojana to boost health infrastructure

Southeast Asia has been identified as a region that could be vulnerable to effects of climate change on health, because of large rainfall variability linked to the El Niño and La Niña oscillation, with attendant consequences for health systems.

## Overview of healthcare in Southeast Asia

Among all reported rubella cases in 2016, a total of 9,512 92% occurred in India and Indonesia Figure. §§ Discussion Substantial progress was

made toward rubella and CRS control in SEAR during 2000—2016, with a 37% decline in reported rubella incidence. During 2000—2016, 84 rubella viruses all genotypes 1E or 2B were reported from the region to the Rubella Nucleotide Sequence Database RubeNS.
