## The Toxics in Fish Strategy is out on the Street

The importance of including predation in fish population models: Implications for biological reference points. Brock D, Saunders T, Ward TM.

## The Toxics in Fish Strategy is out on the Street

In contrast, timber harvesting, which until recently was the primary land use in forested ecoregions in the western United States, does not typically divert headwater streams in the same manner as MCSs. Eight cases of rabies caused by a new rabies virus variant were reported in the state of Cear , Brazil, from 1991 through 1998.

## Habitat Loss

These watershed boundaries and a reference grid with one square kilometer km<sup>2</sup> cells were used in Google Earth mapping program and ArcGIS version 10. In contrast with many MCSs on public lands, MCSs on private lands appear to be legal under state law, pursuant to Proposition 215. The National Park Service is participating in interagency recovery efforts involving the federally-listed endangered and the threatened.

## Predation Risk within Fishing Gear and Implications for South Australian Rock Lobster Fisheries

Water development: Dams and other water diversions siphon off and disconnect waters, changing hydrology and water chemistry when nutrients are not able to flow downstream. Elder Creek is considered to be the least disturbed of the gaged watersheds, and is also the smallest, with a contributing area of 16.

## Wildlife, Exotic Pets, and Emerging Zoonoses

State Water Resources Control Board. The sick pigs were a subsequent source of human infection.

## **Predation Risk within Fishing Gear and Implications for South Australian Rock Lobster Fisheries**

The interaction lobster CPUE:MFA was included given the high spatial dependency of lobster catch rate.

## **Habitat Loss**

Comparison of Water Demands to Summer Low Flows Our results suggest that water demand for marijuana cultivation in three of the study watersheds could exceed what is naturally supplied by surface water alone.
