## **AgeTech solutions: New technologies will make a difference in long**

The commenter contends that enforcement of the current requirements is already weak. Response: We recognize that the proposed rule and this final rule are large, detailed documents, and that many individuals relied on summaries to learn about the proposed requirements.

### **Nadona**

One commenter stated that a center must have the ability to protect staff and residents from this disruptive behavior. Similarly, we did not propose that a full plan of care be developed within a resident's first 48 hours, only that a baseline plan be established.

### **AHCA Education: Infection Preventionist Specialized Training**

We proposed to add a new § 483. Comment: One commenter requested that we clarify that proposed § 483.

### **Nadona**

They also suggested that such entities might not be properly licensed or insured, might not meet the quality standards of the facility, or could potentially create an unsafe situation for the resident.

### **Federal :: Medicare and Medicaid Programs; Reform of Requirements for Long**

Comment: Several commenters supported revisions to a resident's choice of roommate.

### **Nadona**

In addition, the IMPACT Act amended Title XVIII of the Act by, among other things, adding Section 1899B to the Act. She leads a team of

Infection Preventionists in developing policies and procedures as well as developing and delivering education across the company.

#### **AHCA Education: Infection Preventionist Specialized Training**

One commenter suggested we require that these choices are communicated to staff who are assigned using staffing practices that maximize staff's ability to fulfill the resident's choices and that we further state that residents must be able to choose from a range of activities that correspond to their interests. She pursues her passion for improving the lives of residents living in long term care centers by developing educational resources, tools and products for staff, and consulting with staff to improve quality within nursing centers. Response: We thank the commenters for their support.
