### Home

Rommel's opinion was that because of Allied air supremacy, the large-scale movement of tanks would not be possible once the invasion was under way.

### D

Several men were killed as a result, because the German weapons made a distinctive noise, and the men were mistaken for the enemy. Airborne operations The success of the amphibious landings depended on the establishment of a secure lodgement from which to expand the beachhead to allow the buildup of a well-supplied force capable of breaking out.

### Normandy landings

Coordination with the French Resistance Members of the and the US 82nd Airborne division discuss the situation during the in 1944. Deceived, the Germans moved only slowly to reinforce the Normandy defenses after the initial landing. .

### D

The Allies wanted to schedule the landings for shortly before dawn, midway between low and high tide, with the tide coming in. The Allies planned to launch the invasion on 1 May 1944. Many of the German radar stations on the French coast were destroyed in preparation for the landings.

### D

Allied order of battle D-day assault routes into Normandy Commander, SHAEF: General Dwight D.

### D

On August 25, Free French forces liberated with Allied support. Many planes came in so low that they were under fire from both and machine-gun fire. War memorials and tourism At Omaha Beach, parts of the Mulberry harbour are still visible, and a few of the beach obstacles remain.
