Resource Center

Company Paid This section displays the total monetary amount of any company paid expense items included on the expense report. Project status and cost information is fed from the shop floor into the ERP.

Resource Center

If you generate this report from the Expense Report form or the Select Expense Report dialog box and Print Supporting Documents is selected, all supporting documents associated with the expense report are included.

Arch Travel And Expense

Supporting documents display in the order of the expense rows they are linked to. Leveraging project management practices and features, provides a holistic view into processes, KPIs and other important metrics, project by project. Your current processes are costly and time consuming and this may delay business growth.

What is Project ERP?

Cloud-based ERP is typically an operating expenditure, an overhead cost the organization will continue to pay. See your system administrator if it has not been configured.

Detailed Expense Report

Supporting Document The column displays a document icon if one or more documents are associated with the expense item. Users must enter a project number in the Project field.

Setup Tab of Company Expense Report Configuration

PCI is here to support you in this journey. Project ERP for Construction Firms Projects are the lifeblood of construction companies and

contractors, so precise, real-time accounting, job costing and project management are essential to success.

Arch Travel And Expense

When a user associates an expense with a category, the account specified for the category is automatically entered on the user's expense report.
