## Prospective of $^{68}\text{Ga}$

Assessing p-glycoprotein Pgp activity in vivo utilizing  $^{68}\text{Ga}$ -Schiff base complexes.

## Benefits & Risks of Heart and Vascular CT Angiography

Paediatr Perinat Epidemiol 11: Suppl 15—22. Cantorias MV, Figueroa SD, Quinn TP, Lever JR, Hoffman TJ, Watkinson LD.

## Prospective of $^{68}\text{Ga}$

Proteins demonstrate remarkable capability of molecular recognition. Poeppel TD, Binse I, Petersenn S, Lahner H, Schott M, Antoch G.

## Radionuclide Imaging of Viable Myocardium: Is it Underutilized?

Panel b shows similar results with respect to cardiac death.

## Image quality in nuclear medicine

Ottawa: Public Health Agency of Canada. The high clinical value of  $^{68}\text{Ga}$ -labelled SST ligand analogues is recognized and clinical routine practice and regulations are getting established.

## Major Radiodiagnostic Imaging in Pregnancy and the Risk of Childhood Malignancy: A Population

It required considerable effort from academic, clinical and patient communities and societies, and the hard work has started giving results.
