**Hall, G.S., Adolescence: Its psychology and its relation to physiology, anthropology, sociology, sex, crime, religion and education. New York, NY: Appleton, 1904.**

In savage and civilized life, her body is more often mutilated and she is more primitive.

**Adolescence: Its Psychology and its Relations to Physiology, Anthropology, Sociology, Sex, Crime, Religion, and Education. By G. Stanley Hall, Ph.D., LL.D, American Anthropologist**

It is admitted that, if there is a very great preponderance of either sex over the other, the latter is likely to lose its characteristic qualities, and something of this occurs where the average age of one sex is distinctly greater than that of the other.

**Adolescence: Its Psychology and its Relations to Physiology, Anthropology, Sociology, Sex, Crime, Religion, and Education. By G. Stanley Hall, Ph.D., LL.D, American Anthropologist**

Emigration, which in general favors natality, diminishes masculinity, while crossing among the Neo-Latin races and precocious marriages increase it, and syphilis, alcoholism, and arthritism diminish it. Her yesterdays seem a little dusty and her to-morrows a trifle faded. The stories of the great reforms, and accounts of the constitution of society, of the home, church, state, and school, and philanthropies and ideals, should come to the fore.

## Recapitulation theory

This stage begins at approximately age 65 and ends at death. In 1861, five years before Haeckel first published on the subject, Spencer proposed a possible basis for a cultural recapitulation theory of with the following claim: If there be an order in which the human race has mastered its various kinds of knowledge, there will arise in every child an aptitude to acquire these kinds of knowledge in the same order.

## **Adolescence, Its Psychology and Its Relation to Physiology, Anthropology. Sociology, Sex, Crime. Religion and Education.**

The greatest diameter of the skull from seven to thirteen he found to increase only from 14. Boys grow thick most slowly while they are growing tall fastest, and vice versa.

### **Adolescence Its Social Psychology With An Introduction To Recent Findings From The Fields Of Anthropology PDF Book**

That woman can do many things as well as man does not prove that she ought to do the same things, or that man-made ways are the best for her. Schrader found this in 57 per cent of his 114 cases. The superiority of girls over boys in both height and weight lasts five years, or from the twelfth to the seventeenth year, which is much longer than other observers have found.

#### **G. Stanley Hall**

The dimensions of the iliac fossae are less in the female, the distance of the OS pubis is greater, and it has an inclination to the horizon of at least five degrees more than that of the male. Her absolute brain weight to that of man is about as 9 to 10, but her smaller size makes her brain about equal, if not heavier, in weight.
