Control of Substances Hazardous to Health (COSHH) Regulations

Offences by bodies corporate 9. Establishes procedures to prevent major accident hazards involving dangerous substances.

Chemicals

But those placed on the market in Northern Ireland are regulated by the EU CLP, with the European Chemicals Agency ECHA as the overseeing agency. Health surveillance should be conducted under the supervision of a relevant doctor at least annually. Employers will also need to provide employees with precautionary information, instruction and training where a dangerous substance is present at the workplace regulation 9.

SR 2009/273 Health and Safety

Act 1974 Application outside Great Britain Variation Order 1989 and re-enacts them with amendments.

BIOLOGICAL AGENTS, CARCINOGENS AND LABELLING

Provides for enforcement powers in which the operation of services may be suspended and ships may be detained. The majority of the amendments arise from changes to the legislation at European level that regulates the classification, labelling and packaging of chemicals. General provisions as to regulations and codes 5.
