Generic Environmental Impact Statement for License Renewal of Nuclear Plants: Regarding the Arkansas Nuclear One, Unit 1

It is not expected to be a problem during the license renewal term. Nuclear Regulatory Commission NRC to renew the operating license for Unit 1 of Arkansas Nuclear One ANO-1 for an additional 20-year period. A small, inundated wetland south of the effluent bay provides habitat for mammals, fish, reptiles, amphibians, and waterfowl.

Generic Environmental Impact Statement for License Renewal of Nuclear Plants: Regarding the Arkansas Nuclear One, Unit 1

Numerous species of fish and waterfowl utilize the warm water effluent during cold water conditions.

ScholarAssignments

Additional information is included in Appendices. ANO maintains gaseous releases within ODCM limits.

Flax

Federal Water Pollution Control Act of 1977, as amended, 33 USC 1251, et seq. North of the site, the land gradually ascends to 305 m 1000 ft to the Boston Mountains, which has a maximum height of 823 m 2700 ft.

Flax

Because no increase in population is expected as a result from the renewal of the ANO-1 operating license, the staff concludes that the impact on water supply is SMALL, and mitigation is not warranted. However, because virtually everyone in the United States uses electricity and therefore is routinely exposed to ELF-EMF, passive regulatory action is warranted such as a continued emphasis on educating both the public and the regulated community on means aimed at reducing exposures. The first four lines in the table are attributable to ANO-1, the fifth line is attributable to ANO-2.

Generic Environmental Impact Statement for License Renewal of Nuclear Plants: Regarding the Arkansas Nuclear One, Unit 1

The maximum water velocity through the traveling screens is approximately 0. Two 500-kV lines run south about 38 km 24 mi and then split with one line going west about 109 km 68 mi and the other line going east about 107 km 67 mi.
