### 酒井雄哉 [WorldCat Identities]

These arbitrary syntactic labels are used for the construction of lexical and syntactic rules. The results for the 13 tested grammars are aggregated below.

### 酒井雄哉 [WorldCat Identities]

We will explore why this is so.

### The Migrant Mind: Babel: Evidence of one Language

These change their outline every cycle by simple rules dictating whether squares adjacent to shaded squares get shaded or not, and whether shaded squares stay shaded. Max Planck Institute for Evolutionary Anthropology. A-Life systems are often, by comparison, architecturally simple, populated in a homogeneous structure by model individuals with initially very simple internal structures.

Conversely, if lack of redundancy is selected for, the preferred grammars will be those which manage to express meanings with only one expression each. The more one tries to flesh out any non-evolutionary explanation of how languages got to be the way they are, the less plausible any creationist or macro-inventionist account seems.
