You should choose courses that interest you or that will further your career objectives.

### Environmental law

Environmental law, or sometimes known as environmental and natural resources law, is a term used to explain regulations, statutes, local, national and international legislation, and treaties designed to protect the environment from damage and to explain the legal consequences of such damage towards governments or private entities or individuals <sup>1</sup>. The laws protect a property owner from having another person or corporation infringe on their right to enjoy their own property. They exist in many areas of international law but are especially useful in the environmental field, where they may be used to regularly incorporate recent scientific knowledge.

### Environmental Law

In the , the primary protection was found in the law of , but this only allowed for private actions for damages or injunctions if there was harm to land. As an environmental lawyer, you can work on legislating for environmental protection to representing cases relating to contaminated spaces and endangered species protection to reconciling the challenges between land development and water use and conservation. Independent review of the EPBC Act.
