How to Become a Laboratory Animal Veterinarian

We possess testing capabilities in the areas of pathology, microbiology, clinical pathology, virology, molecular diagnostics and many more. The experiential component is gained in program management, experimental surgery, anesthesiology, clinical medicine, clinical pathology, toxicology, and facility maintenance and design by completion of rotations within the animal care facilities on campus. A team of twelve veterinary technicians under the supervision of the Associate Director for Veterinary Care assist the veterinarians in the care of research animals and are available for fee-for-service assistance to scientists.

2021 NCALAM Workshop in Laboratory Animal Medicine (Virtual Meeting)

The second and third years are designed to provide the clinical trainee with more specialized training in laboratory animal medicine as well as to develop, oversee, complete, and submit for publication a hypothesis driven research project. Please Note: November 4th, 2018 is the deadline for Lab Animal Program Application Submissions SPECIAL NOTE: The California Veterinary Medical Board requires all veterinarians working at the University of California, Davis with primary patient care duties to hold a special University license. There are state-of-the-art facilities totaling approximately 40,000 square feet of mostly rodent space.

Unit for Laboratory Animal Medicine

The course includes ethical and legal issues in the conduct of research and outlines the University of Illinois research standards, regulations, and procedures.

How to Become a Laboratory Animal Veterinarian

These technicians have expertise in veterinary medical care and anesthesia of a wide variety of species. Continuing appointments after the first and second years are contingent upon satisfactory performance during the preceding year.

Laboratory Animal Medicine Training Opportunities

Depending on the facility, research activities, hazards, and animal species involved, the program may not affect all personnel equally. Certification Requirements of Laboratory Animal Veterinarian Once the candidate has successfully navigated the residency program, they have the opportunity to earn board certification through the.

Laboratory Animal Medicine Residency (Minnesota)

The PHS Policy explicitly requires that training includes research or testing methods that minimize the number of animals required to obtain valid results and minimize animal distress.

Residency Program in Laboratory Animal/Primate Medicine

Lab Animal Medicine We Care For Our Animals As If Human Lives Depend On It The Department of Laboratory Animal Medicine DLAM is committed to providing UNTHSC faculty, staff, students and other partners with high quality, cost-effective research bio-resources. The level of financial support allows the program to accept one veterinarian per year with a total of three fellows in the program at any given time.
