Geography in the News: Chernobyl's Legacy

The United States, with a vastly smaller army, then and since has refused to make a similar promise.

Soviet nuclear sites leave grim legacy

Elsewhere, military officers stole HEU fuel from a submarine base in Murmansk. As of February 2000, more than 8 years after the collapse of the USSR, new security systems had been installed at 113 buildings, most of them in Russia; however, these sites contained only 7 percent of the estimated 650 tons of weapons-usable material considered at risk for theft or diversion. The mythical capabilities of atomic energy continue to permeate debates today about combating climate change and challenging our fossil fuel addiction.
