## Statistics from 1970 Census of Population and Housing

The first dataset contains the 1-Year Summary File, providing estimates of 2010 population and housing characteristics for areas with a population of 65,000 or more.

## California statistical areas

The last data released was for December 2020. PUMAs do not cross state boundaries. Genealogists wanting the 1900 census data are advised to use Ancestry.

## Demographics, Consumer Spending, Economy Data

The most basic geographic variable is the Labor Market Area LMA , which can be any combination of counties. Genealogists wanting the 1920 census data are advised to use Ancestry.

## Wage inequality is surging in California — and not just on the coast. Here's why

The Western states and outlying possessions.

## CDBG Reports, Program Data, and Income Limits

Approximately one-third of the enumerator work force was retained for work in the second stage—receiving additional training that focused solely upon the content of the sample questions. The Bureau of the Census has transferred data from the First, Fourth, and Fifth Counts to NARA.
