## Young People and Drugs

It is based on information provided by 96 043 students from 35 European countries, 24 of them being Member States of the European Union. The proportion of adults aged 16 to 24 years who reported any drug use in the last year, however, was higher 21%; 1. It is a factor in the three leading causes of death among 15-24-year-olds: accidents, homicides and suicides, In 2017, more than 33% of 12th graders, 19.

## Social determinants of drug use

If an employer provides support to an employee who has had a confirmed positive drug or alcohol test, this type of testing may be used to help with rehabilitation. What are the most recent developments in drug prevention, treatment and policy? Drug use among English and Welsh teenagers is also high, with 15-year-olds top of the list of LSD and cannabis users and in the top three for ecstasy use. Friends, family life, quality of life, stress, socio-economic status and peer pressure can all increase the risk.

## Drug and alcohol services for teens

However, for the reasons outlined above, it is not recommended that direct comparisons are made with drug prevalence data prior to 2016.

## Social determinants of drug use

The service is a dynamic one, incorporating latest research to offer a quality, evidence-based model of engagement and treatment. Please fill in the security field below to prove you are human. Nearly three quarters of students 72% have consumed alcohol that is, more than just a few sips by the end of high school, and more than a third 37% have done so by eighth grade.
