## The Tower of London

The construction of the city walls in stone in about AD 200 influenced the later siting of the castle and defined its eastern limits until the mid-13th century. The history of England is inextricably linked with the stories of its leading aristocratic dynasties and the great seats they have occupied for centuries.

To either side, running along the west and south of the Inner Curtain Wall, are Nos 1, 2, 4, 5, 7 and 8 Tower Green; domestic houses and dwellings dating from the 17th to the 19th century.

## Tower of London books and articles

This book, the only publication on a fascinating subject, covers some 40 major home and 100 lesser ones, starting in the 13th century in the walled city of London and moving on to the then suburbs of Bloomsbury, Holborn, Soho, Piccadilly and St. It is a two storey U-shaped building with heraldic cartouches on the west and south façades.

## The Tower of London

The keep is Anglo-Norman in style with flat pilaster buttresses defining each bay, round-headed windows and a crenellated parapet. In the first half of the 16th century, a programme of repair was initiated. Improvements were carried out under Henry I and Henry II whilst Richard I extended the castle further west.

Minor archaeological investigations, such as watching brief reports, and some other 'grey' literature is most likely to be held by H. The west side of the curtain wall, including the Beauchamp Tower, was built for Edward I between 1275 and 1285. The New Armouries, attached to the southern half of the east wall of the Inner Curtain, is a red brick small arms store of 1663-64.
