Changes are assessed to determine whether they met expectations.

Video News

Each meeting was driven by the review of a 20-page, 1,500 step Microsoft Project schedule. Workflows were not thought through. Why are they not successful? A lot of money was lost; resources were consumed that could have been applied elsewhere; expectations were raised and then eliminated; and reputations were impacted.

Video News

Setup We previously noted that readiness should be assessed and the results reviewed continually during the project, each time revealing greater levels of granularity.

Video News

The service and operations representatives were very forthcoming with their information, and their responses gave us a good picture of what we had to face.

Operational readiness

By providing them with an overview of what they should expect from the system, we began to build trust. Systems are all checked, user acceptance complete, production environment is ready to roll! This is particularly applicable to projects in financial services institutions, which have a global reach. These are necessary deliverables for any project that develops new or enhanced products, processes, or systems.

Post an Entry

Agenda We defined a five-day period for the assessment.

Operational readiness

One could only imagine how the folks on the phone were feeling.
