Forensic Ballistics MSc

They determine angles of various projectiles and report their findings to the investigative team.

Crime Scene Investigator Job Description

A ballistics expert is a forensic specialist who collects and analyze firearms, ammunition and similar ballistics-related evidence. Looks at ballistics investigation and how the technique is used to help capture criminals, and also provides information about the training and education necessary to work in the field and what career opportunities are available. After completing their analyzing and testing, ballistics experts must write detailed reports on their findings, which may be used at trials, in criminal court cases or by law enforcement agencies.

How do I become a Forensic Firearms & Ballistics Expert?

Prosecutors may need to check alibis and make sure that the forensic evidence supports their case.

What Jobs Are Out There With a Diploma in Forensic Science?

Oct 03, 2012 Television shows like the CSI: Las Vegas Crime Scene Investigation or Investigators and its spinoffs CSI: Miami and CSI: NY may portray some true-to-life crime scene analysis, but according to most police detectives and other law enforcement officials, these shows are more fiction than fact.

Ballistics Experts

Firearms examination is a highly specialized field of forensic science. They work in labs and actually fire guns to analyze how a homicide may have occurred, at what angle the gun was shot and even can pinpoint the height of a shooter.

How to Become a Ballistics Expert

Other Helpful Skills and Experience Prospective firearms experts should have strong written and oral communication skills, as they will be

expected to write detailed reports and to testify in court. The field work of a Forensic ballistic expert is on the crime scene. Forensic toxicologists screen bodily fluids, hair, and nails for any substances that may be present in either the victim or the suspect.

What Jobs Are Out There With a Diploma in Forensic Science?

Criminalistics Criminalistics, a term stemmed from the German word kriminalistic, is an applied science.
