TREATING ADOLESCENT SUBSTANCE ABUSE UNDERSTANDING THE FUNDAMENTAL ELEMENTS

They should be assured that the results will remain strictly confidential Juvenile Delinquency and Crime The link between adolescent substance use and juvenile delinquency is complex. Most of the recent increase is attributed to marijuana use, which rose significantly during this period. The EPC solicits input from Key Informants when developing questions for systematic review or when identifying high priority research gaps and needed new research.

Characterizing substance abuse programs that treat adolescents

Over time, a person's ability to choose not to take drugs is compromised. It is further estimated that 9 percent of adolescent girls and up to 20 percent of adolescent boys meet adult diagnostic criteria for an alcohol use disorder Furthermore, the proportion of daily smokers among American high school seniors remains disturbingly high at about 20 percent.

Ethical issues in research on the treatment of adolescent substance abuse disorders

The AHRQ TOO and the EPC work to balance, manage, or mitigate any potential conflicts of interest identified.

TREATING ADOLESCENT SUBSTANCE ABUSE UNDERSTANDING THE FUNDAMENTAL ELEMENTS

Summary of Protocol Amendments No protocol amendments to date. Evidence-based prevention interventions may target risk and protective factors in the individual, family, peer, school and community domains.

Addressing Substance Use in Adolescents: Screening, Brief Intervention, and Referral to Treatment

Technical Experts Technical Experts constitute a multi-disciplinary group of clinical, content, and methodological experts who provide input in defining populations, interventions, comparisons, or outcomes and identify particular studies or databases to search.
