Mobilities: new perspectives on transport and society

On the moral economy of country life.

Transport revolution

These figures do not take account of any wider social benefit from wholly new trips. What can be the best investment choices for venturing into new product and service lines? Other projects have been part funded by New Deal for Communities programmes or other Neighbourhood Renewal funds, which will come to an end by 2010. While PAR is increasingly utilized to study inequalities, its application to capture multiple dimensions of disadvantage that affect health has received much less attention.

TRAN Publications

A key enabler for the future of eVTOLs could be unmanned aircraft system traffic management UTM , which would have to work in conjunction with existing air traffic management systems.

Critiquing the Mobility

For more detailed information please read the full report. Expected outcomes Knowledge syntheses are comprehensive analyses of literature and other forms of knowledge on a particular question or issue. In the daytime evacuation scenario, a longer mobilization time was required for older people and those whose dwellings were constructed according to the 1981 Building Standards Act.

Mobilities: new perspectives on transport and society

Maidenhead: Open University Press; 2009. The results of both sets of calculations individual user benefits and new trips due to better accessibility are summarised in Table 1. What data are currently being collected, and which indicators best measure success? To attain this purpose, two levels of spatial heterogeneity are considered.

News/Events

Background Multiple structural, contextual and individual factors determine social disadvantage and affect health experience.

Micro Mobility Market Demand and Research Insights by 2027

Trains are considered the least safe and are used because fares are cheaper.
