## 3 ways the coronavirus pandemic could reshape education

These new flows of energy, originally imported to the Earth from the sun ages ago, have been stabilized underground for millions of years as inert deposits of carbon. Without it, it would float off into space.

## How will the coronavirus change our lives?

All of these together create impressions in the mind which then helps form our consciousness and produce our emotional predispositions, character traits, memories, and even unexplainable fears. Our city of 2050 functions because streets are clear for buses and streetcars and bikes.

## How will the coronavirus change our lives?

People stopped talking about it. But once animated, the broom could not be stopped. We actually have a monthly meeting to talk about what we can do to increase sustainability within the community and within our city.

## Life Without Gravity

The United Nations has designated October 31 as World Cities Day—a day to recognize the challenges and opportunities of urbanization and to foster conversations around enabling sustainable urban development around the world. Our job is to put sustainability and its principles of resilience and strength, creative regeneration, and respect for the earth at the centre of our artistic vision.

## The Future

We will also be joined by Pigalle, Tavakkoli, Head of Experience for Guerrilla Science who will be discussing and screening their project Escape To Reality, a video installation questioning us to think about how the brain creates an interpretation of the world. I see wide, grassy pastures, lined

by trees.
