Solidification and gravity IV : proceedings of the 4th International Conference on Solidification and Gravity, held in Miskolc

The scientific level of the presentations was guaranteed by a selection process where each contribution was rated by three members of the Program Committee. The IYCP will be divided into three sections. That experts of diverse disciplines from across the world were sitting under one roof for five days, exchanging views and sharing findings, was a speciality of this conference.

Solidification and gravity 4 : proceedings of the 4th international conference on solidification and gravity : held in Miskolc

The 29 invited, 12 contributed oral and 41 contributed poster presentations were selected following communication with the international organizing committee members. This volume contains the papers presented at the fifth International Conference on the Learning Sciences formerly the International Conference on Artificial Intelligence and Education. The editors express their thanks to those authors who contributed the papers published in this proceedings, which reflects the scientific value of the conference.

Solidification and gravity 4 : proceedings of the 4th international conference on solidification and gravity : held in Miskolc

A summary of the presentations and conclusions from the discussions are presented in this publication. All accepted Papers will be published in the IOP Conference Series: Materials Science and Engineering MSE , and included in the NanoStruc online digital library.

ICRTP2012 attracted a total of 130 abstracts submitted by scientists from 7 different countries. By 2009, searches for gravitational waves based on external triggers received from electromagnetic observations were already producing significant scientific results and plans existed for pointing telescopes by utilizing gravitational-wave trigger events. It has greatly contributed to the nation's industrial, economic and cultural development.
