The Second lure to turning green wood is that the size of the bowl is not limited to what is available in the lumber yard.

Other Antiques & Collectables

Glad you are draw pinning, that is a lost all its own. I'll try though I don't have a picture of the open joint.

Green Wood End Sealer

Even wet wood generates enough friction to heat up a chain and its bar. If they are not they will cause the bowl to crack. Split off any excess and plane the bottom edge of the rail - here again the bottom of the rail falls slightly away from the fair face.

Working Green Wood With Peg

Stiles are square in cross-section.

Dry peg coat hooks in green wood

.

Woods to Know: Spalted Maple

PEG is used in a ton of biochemical and pharmaceutical applications. So here is my caffeine fueled 3am math. Unfortunately those products are even more expensive than the ones advertised for wood treatment, I thought I might be able to beat the system by buying industrial.
