Encouraging young women to have regular smear tests: nurses must do more to encourage younger women to enrol in the national cervical screening programme if it is to reach its intended target numbers.

Each gynecologist submitting more than 100 smears annually for testing should receive a report on the smears taken, comparing them with the anonymized list of all smear takers using the cytological laboratory. During the test The smear test itself takes about 10 minutes, and the smear taker will advise you how to get into position. Those who receive more frequent cervical screening due to a previous screening result and were due to be invited during the pause will receive their invitation or any reminders they were due by the end of September.

Cervical Smear Tests: What Women Need to Know

Personal barriers such as lack of knowledge or awareness of the purpose and benefits of the test, as well as fear and anxiety about the procedure itself, can also play a role. Resuming cervical screening Regular cervical screening routine screening invitations and reminders are now being sent.

Guide for Test Takers

May13 Rheumatology Joint Injection Care Pathway for Rheumatology Joint Injection Care Pathway. Breitenecker G, Dinges HP, Regitnig P: Zervixzytologische Nomenklatur und Befundwiedergabe — Neue Leitlinie der Österreichischen Gesellschaft für Zytologie.

Cervical Smear Tests: What Women Need to Know

We have worked with to put the guidance together and have learned from their experiences working with women to address some of the sensitive issues around sample taking. The cervical screening test also known as a smear test takes a sample of cells from the cervix neck of the womb and checks it for human papillomavirus HPV.
