## Educational Guidance: Meaning, Nature, Needs and Objectives of Educational Guidance

How a child passes through the various stages of growth and what are the characteristics of each stage are included in the study of educational psychology. UNESCO and the United Nations have developed a number of standard-setting instruments, declarations, and action plans which provide the basic framework for promoting the concept of education for a culture of peace worldwide — the 1974 Recommendation concerning Education for International Understanding, Co-operation, and Peace and Education relating to Human Rights and Fundamental Freedoms Paris, 1974 , the World Plan of Action on Education for Human Rights and Democracy Montreal, 1993 , the Declaration and Programme of Action of the World Conference on Human Rights Vienna, 1993 , the Declaration and Integrated Framework of Action on Education for Peace, Human Rights and Democracy Paris, 1995 and the Plan of Action for the United Nations Decade for Human Rights Education 1995—2005. However, this method will explain only observed behaviour, subjectivity of the investigation may affect the results.

## Notes on Educational Psychology: Nature, Scope and Methods

These are characteristics that refer to the person who receives and processes a message.

## Concept of Education

Emotion is a common component in persuasion, social influence, and attitude change. Philosophy describes and explains the learning experiences of an individual from birth through old age.

## Concept of Education

So we find that children are speedier and more efficient at learning tasks as they grow older.

## Concept of Education

It is believed that in order to be able to grasp and retain a certain material the individual must have an inner urge to learn, a drive that can motivate

him into learning.

### **Social Research: Meaning, Nature and Its Utility**

At present only its behavior exists. In order to ensure that the data are reliable and free from bias, the researcher needs to consider what mode of administering the instruments or tools of data collection would be most desirable in view of the kinds of responses sought and the nature of the objects or persons covered by the study.

### **Notes on Educational Psychology: Nature, Scope and Methods**

Cooperation and helping in the classroom: a contextual approach. The studies discussed earlier focused on primary and secondary education and are not fully applicable to higher education, because students in undergraduate classes may have different schedules and often have not met before. Tabulation is a part of the technical procedure involved in the statistical analysis of data.
